

From **COP21** in Paris...

to **COP30** in Belém

COP21 (30/11–11/12/2015)

We are asking for:

1. EU structured dialogue on subnational dimension
2. Local and regional governments at COP discussion table
3. Reinforced networks capacity
4. Mainstreamed climate action
5. Local green public procurement
6. Climate and COP in international Development and UN Habitat III processes
7. Multilevel finances and political frameworks applied to climate change
8. EU regulation for efficient and integrated local action
9. Exchange of good practice at all levels

We urgently need!

- A real and stronger multi-level governance to be in the dialogue tables at all levels

- More efficient, financial and human resources for a clean transition

- Real partnerships, capacity building and cooperation for impact

- To localise the SDGs to achieve the decarbonisation goals

- The UN agendas must be aligned and involve the subnational level adequately
